

Am I a Good Candidate for Breast Augmentation?

One or more of the following feelings or conditions may indicate that you are a good candidate for breast augmentation:

- You are bothered by the feeling that your breasts are too small
- Clothes that fit well around your hips are often too large at the bustline
- You feel self-conscious wearing a swimsuit or form-fitting top
- Your breasts have become smaller and lost their firmness after having children
- Weight loss has changed the size and shape of your breasts
- One of your breasts is noticeably smaller than the other

Need a plastic surgeon and don't know who to choose?

Amerejuve is the premier provider of cosmetic surgery in the Greater Houston area with eight locations. Our surgeons provide complimentary consultations in each Amerejuve office, as well as in their private offices they use on a daily basis. No matter what day or area of town you may be in, there is always a convenient location near you.

Have a tummy that doesn't look like it used to? Consider Liposuction (fat removal), a Mommy Makeover, or an Abdominoplasty (tummy tuck). Hate the fat on your arms or legs? Consider Brachioplasty (arm lift), Thigh Lift or Liposuction. Always wanted larger breasts? Consider Breast Augmentation. We also do Mastopexy (breast lift) and Breast Reduction. Does your face make you look older than you are? Blepharoplasty (eyelid rejuvenation) gives dramatic results with minimal down time and virtually invisible scars. For more improvement, consider a Mini- or Full Facelift, Brow Lift, or Neck Rejuvenation. Hate the lump on your nose? A Rhinoplasty (nose reshaping) can correct it.

While other surgeons may give you different prices that complicate your decision, you will receive the same Amerejuve standard price for your procedure, regardless of which Amerejuve surgeon you choose. So choose your procedure, and choose your surgeon—it doesn't cost more at Amerejuve.

Amerejuve offers multiple plastic surgeons for you to choose from to fit your needs and expectations. Knowing that our plastic surgeons are double-board certified and have extensive plastic surgery experience can make you feel confident going through with the surgery and body transformation of choice. Regardless of whom you choose, at Amerejuve, you are guaranteed to be treated with the respect and excellent customer service you deserve.

And, unlike most surgery offices, Amerejuve can offer Amerefit personalized weight & wellness services to help you maximize the benefits of your surgical procedure, as well as improve your health and wellbeing. Look Good, Feel Good!

BREAST AUGMENTATION

look good feel good

What is a Basic Description of the Breast Augmentation Procedure?

Once anesthesia has taken effect, your plastic surgeon will make an incision behind each breast to create a "pocket" - a space within your breast tissues - for each breast implant. The breast implants will then be placed in the pockets and positioned for optimal appearance and symmetry. After comparing both breasts to ensure proper implant placement, your plastic surgeon will close the incisions - usually with stitches, although tape or glue may also be used.

Where Is the Breast Augmentation Surgery Performed?

Breast augmentation is most frequently performed on an outpatient basis in a hospital operating room, surgery center, or surgical suite in a surgeon's office. You and your plastic surgeon may also decide on an approach to your surgery that could require an overnight stay at the hospital.

How Long Does the Breast Implant Procedure Take?

Cases may differ, but on average the surgery lasts one to two hours.

What Anesthesia Will Be Used?

General anesthesia is commonly used, but local anesthesia also is an option. Your doctor can discuss with you the most appropriate choice of anesthesia for you.

"This was the best thing I have ever done for myself. I feel more feminine and my self confidence has improved."

F. Chelsea, age 33
